# Offset Test Page

Instructions:

- print this document on your printer on a A4 paper
- import this document into your lasercutter software
- make sure that all objects are grouped together
- move the grouped objects to 0/0 coordinates
- disable green document bounding box
- disable (if available) black text
- adjust power/speed of red crosses to cut this paper
- use some sort of mechanical alignment for this paper in the lasercutter
- choose absolute coords of the lasercutter within your lasercutter software
- run a first test
    - measure offset with a ruler
    - adjust the offset in the lasercutter software
    - repeat test/measure/adjustment until the cuts match the red crosses

Your Notes:

Date / Test Number: _____

Printer: _____

Lasercutter: _____

X-Offset: _____

Y-Offset: _____
